Sex Doll Care & Maintenance Guide

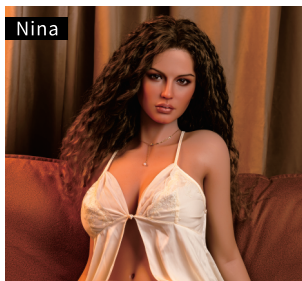

Congratulations, you finally got your very own **SAVAGEME Dream Girl Doll**. Now that she's by your side, you'll want to take good care of her so that she can please you for a long time.

What's included: Each box comes with 1 doll, 2 wigs, 1 set of lingerie & panty, 1 pair of gloves, 1 USB heating rod, and 1 cleaning bottle.

For novelty use only

BEFORE USE

- 1.Lay the box flat on the floor to unbox. Remove any wrapping and protective materials and carefully remove the doll from the box.
- 2.Be sure to handle your doll with proper safety procedure as most models weigh over 70 lbs. Use caution when moving/lifting your doll to avoid injury to your body or damage to your doll.
- 3.To attach the head to the body, insert the screw in the neck hole and twist to tighten. Place the head on the screw and rotate the head to secure.
- 4.Use water-based lubricant only to avoid damaging your doll. Do not apply perfume, lotion, chemical or harsh disinfectants which may damage the material of the doll.
- 5.Use water-based lubricant only to avoid damaging your doll. Do not apply perfume, lotion, chemical or harsh disinfectants which may damage the material of the doll.
- 6.Nails and eyelashes can be reattached with glue if they become loose. Eyes can be adjusted to face the desired direction. Use a wide-tooth comb to brush the wig slowly. Wig can be washed with gentle shampoo/cleaner. Air dry or use cold air setting on the hair dryer.

USING YOUR DOLL

- 1.Our dolls are made of TPE and a metal skeleton. The material feels very realistic to the touch. TPE is hypoallergenic, body safe and environmentally friendly.
- 2.The head and body of the dolls can move within reasonable range. The metal skeleton allows the dolls to easily pose in different positions (within certain limits) and maintain its posture. During initial use, the limbs may feel stiff to move. After a few movements, the joints will loosen up.
- 3.Insert the heating rod in vagina, anus, or mouth to enhance the enjoyment.
- 4.Handle your doll delicately and with care. your doll is made from elastic material. Do not bend the doll aggressively or put it in unrealistic angles. Excessive force or pressure can cause deformation and damage.
- 5.Do not bend your doll in unnatural position or stand for too long as it may cause deformation. Excessive stretching over a long period should be avoided. After use, you should reposition your doll in its original position (Legs and arm straight and down).
- 6.You can dress up your doll with clothing, accessories, and shoes. Avoid contact with any sharp objects/edges. Avoid contact with dark colored fabric as it may stain your doll.

AFTER USE

1. Gently rinse off the doll clean with soap and warm water after use. Use the water bottle provided to reach and clean the vaginal, anal and oral holes.
2. Do not use any harsh cleansers/chemicals with your doll.
3. Do not allow water to enter the interface between the neck and body as it may cause rust and affect the doll's features.
4. After cleaning, allow your doll to dry naturally or use a light color towel. Use sex doll renewal powder or talcum/baby powder to keep your doll fresh and clean.

STORAGE & MAINTENANCE

Proper storage is important to prevent the aging of the TPE skin & internal skeletons and can greatly extend the life of the doll.

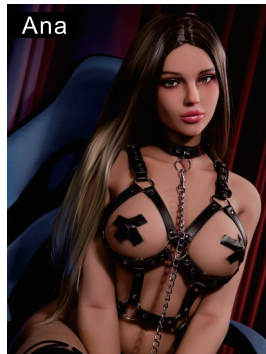

1. Lay your doll flat and face up and store in a cool, dry place away from sun and heat. Keep the doll in straight position to avoid damage to the skin or the skeleton.
2. If needed cover the doll in light-colored fabric and use a clear bag to pack for storage.
3. The surface of the doll sometimes will attract dust and stains. To maintain the doll's skin and keep the surface clean, please clean and maintain it at least once per month.

PRECAUTIONS

1. Avoid excessive force or pressure on the doll. Do not place heavy objects on the doll.
2. Do not leave your doll standing or in delicate positions for a prolonged period.
3. Do not leave tight fitting clothing/shoes/accessories on your doll after use. Contact with tight clothing, sharp edges or objects can cause skin damage or creasing to your doll.
4. Avoid direct sunlight: Prolong exposure to sunlight will cause slight fading of the doll skin.
5. Avoid humid environment. Long-term immersion in water is harmful to the material. Avoid hot water.
6. Avoid prolonged contact with color fabric as it may cause the doll to stain. The stains can be difficult to remove.
7. Avoid extreme temperature: The doll should not stay in an environment with too high or too low temperature for a long time and the most suitable environment is between 41°F to 95°F.
8. Keep away from fire or excessive heat as material can be flammable.

HOW TO SAFELY REMOVE THE DOLL FROM PACKAGING

Lift the doll out of the box with your arms supporting its back and behind its knees gently and securely.

HOW TO ATTCH THE HEAD

Quick connector

Inserts directly without any rotation.

Screw connector

By rotating the connection, it is more secure

MOVEMENT RANGE GUIDELINES

Important: Never move the doll's limbs beyond the manufacturer's recommended range specifications to prevent damage to internal mechanisms and joints.

Head tilt angle should not exceed 90 degrees

Head tilt to the left should not exceed 90 degrees

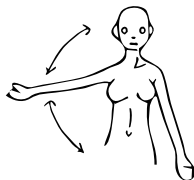

Head can rotate left and right. The tightness is controlled by screws.

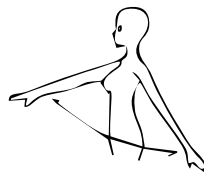

Hands can bend up and down up to 180 degrees

Arms can spin

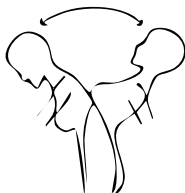

Forearm rotation should not exceed 90 degrees

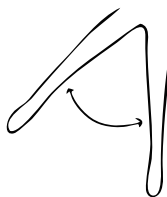

Arm movement should not exceed 180 degrees

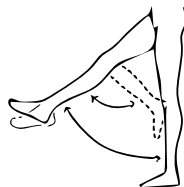

Arm movement should not exceed 180 degrees

Waist can up and down not over 70 degrees

Legs can left and right open not over 70 degrees

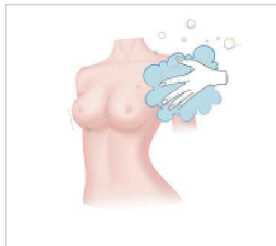

Front leg lift should not exceed 90 degrees. Calf and foot bends should also not exceed 90 degrees

HOW TO CLEAN A SEX DOLL

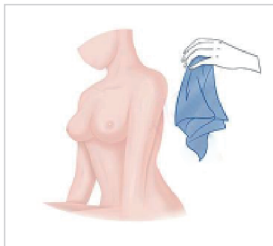

1

Mix mild soap. with water to clean the body gently. Wash with warm water. No excessive force to avoid damage to the skin.

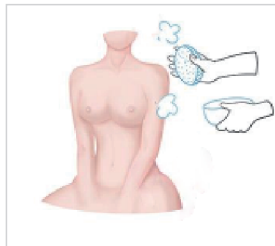

2

Gently pat the body dry with a clean towel to remove any remaining moisture.

3

It's best to apply body powder to keep the skin dry

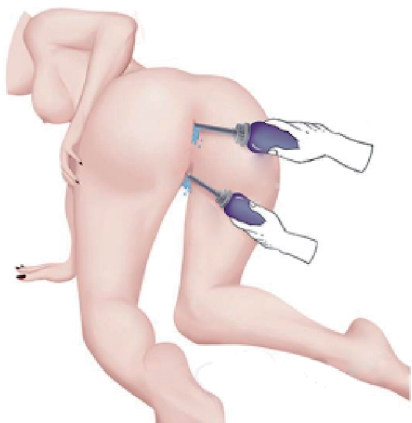

ATTENTION!

Dry the surface and the tunnels of the doll completely to avoid fungus. Once the doll is moldy, there is no remedy. Keeping the doll dry is very important for the life span of the doll and your personal health.

VAGINAL CLEANSING

Intended for cleaning penetrable areas(mouth,vagina,and anus).Follow these steps for effective cleaning:

01

Fill the bottle provided with clean, warm water or mild soapy water.

02

Gently insert the nozzle of the irrigator into the tunnel.

03

Squeeze the bottle gently to release the water and flush out the tunnel. this works best at the edge of the bed, with a bucket or bowl underneath.

04

If necessary,repeat the process until the inside is thoroughly cleansed and no longer slippery.

05

For the final rinse,use clean water. Dry the tunnel with sponge or soft white cloth.
